## ARCHIVE NOTE

ARCHIVE DECISION - EPA REGION VII

SITE NAME: Collis - Adams and Chamberlain EPA ID#: IA004730371 SSID#: 0759Alias Site Names: Collis CorpCity: Clinton State: IA County or Parish: Clinton Zip Code: 52732

## DECISION CHECKLIST:

No Further Superfund Interest Exists at the Site based upon the following:

All CERCLIS Site work has been completed.

{site assessment, RI/FS, RD, RA, O&amp;M, All Monitoring, Closeout Report, 5-yr review, NPL Deletion, Removal(s)}:

☒ Yes ☐ No ☐ N/A

All Enforcement actions have been completed.

{PRP has complied with all aspects of enforcement document(s), All Orders and/or Consent Decrees have been closed out}

☒ Yes ☐ No ☐ N/A

All Cost Recovery actions have been completed.

{final billing sent &amp; collected, referral completed, DD completed}

☐ Yes ☐ No ☒ N/A

All existing monitoring wells closed in accordance with State Regulations.

Date of final well closure: \_\_\_\_\_

☐ Yes ☐ No ☒ N/A*If any of the above questions have a no response, site does not qualify for archival.*

## DISCUSSION/RATIONALE FOR ARCHIVAL:

See the attached CERCLIS printout for the site.

The Collis Corporation (Collis), formerly a division of Chamberlain Manufacturing Corporation, is located in Clinton, Iowa. Collis manufactured lightweight metal shelves, mostly for use in refrigerators. The manufacturing process included plating operations. Wastes from the plating operations were placed in onsite surface impoundments from about 1970 to 1979. The surface impoundments operated at the site were unlined. The wastes in the surface impoundments were plating sludge wastes, containing zinc cyanide and chromium. Tanks, 55-gallon drums and other containers were also used for waste management during the years of operation.

EPA contractors completed a preliminary assessment/site investigation (PA/SI) of the site in November 1980. At that time, sludge was being removed from the 6 surface impoundments. EPA issued a RCRA 3013 Administrative Order to Collis in 1982 requiring groundwater monitoring, testing, and analysis near the surface impoundments. The EPA Field Investigation Team (FIT) completed a SI Reassessment of Collis in 1989, at which time monitoring was being done under the RCRA 3013 Administrative Order. EPA recommended the site be deferred to the RCRA program.

EPA deferred this site to the RCRA program in 1989. No known monitoring wells were installed under authority of the Comprehensive Environmental Response, Compensation and Liability Act/Superfund Amendments and Reauthorization Act (CERCLA/SARA). No further response under CERCLA/SARA is required.
